Welding solutions that work for your business.

ELECTRON BEAM WELDING – LASER WELDING – RESISTANCE & GTAW
Job Shop Welding and Helium Leak Testing Services

HIGHLIGHTS

- NADCAP ACCREDITED
- AWS D17.1 CERTIFIED OPERATORS
- AS9100C / ISO9001:2008 CERTIFIED
- ISO 13485:2003 CERTIFIED
- REPS FOR EBES BEAMER LINE OF EB WELDING MACHINES
- FOUR DECADES OF EXPERIENCE

We specialize in precision metals joining, and we solve problems others are unable to resolve. We have helped customers all over the world with their designs, and have added our expertise to theirs to produce a better product. We offer our customers over four decades of experience to help them produce a better product at a lower cost.

Flexible solutions for your welding needs

JOB SHOP WELDING SERVICES
Electron Beam Engineering provides services to customers throughout North America for both precision electron beam and laser beam welding of complex components. We’ve worked with a diverse customer base that includes numerous products from a wide range of industries such as those listed below:

- Aerospace & Defense
- Automotive & Transportation
- Commercial Industries
- Communications & Space Exploration
- Electronics
- Medical
- Oil & Gas
- Sensors & Semi-Conductors

QUALITY SOLUTIONS
We are AS9100C, ISO9001:2008, and ISO 13485:2003 certified. We are also a Nadcap approved source for electron beam welding. We offer a state of the art metallurgical lab for processing weld samples. Weld sections ensure that our customers weld requirements are always met. Quality Control is an integral part of each one of our projects. It contributes to our world-class solutions.

EB WELDING SOLUTIONS
EB welding has become a preferred technique for small precision parts requiring very high quality welds in steels, stainless steels, titanium and other exotic alloys. It provides the ability to weld in areas not possible by conventional means since an electron beam can be projected into locations previously inaccessible. It offers a superior quality of welds with no oxidation.

LASER WELDING SOLUTIONS
Laser welding is a versatile process, but is particularly suitable for joining stainless steels and titanium. The advantage of laser beam welding versus EB welding is that no vacuum chamber is required. Eliminating the need for a vacuum chamber, a pumping system and the time necessary to evacuate the chamber equates to lower cost. Precision Laser Welding Service of small, micro and delicate parts is done with YAG lasers and with Fiber lasers for larger components.

WE CONSISTENTLY WORK WITH A DIVERSE CUSTOMER BASE. HOW CAN WE HELP YOU?
Contact our sales department or a technical staff member to discuss your next project.
VISION
Seek new ways to improve and refine our business by working together and building trusting relationships with our customers.

MISSION
Provide top quality welds and on-time delivery at a competitive price.

PURPOSE
Strive to exceed our customer’s expectations by utilizing the knowledge, experience, ingenuity and dedication of our employees.

CAPABILITIES:
Welding solutions you can build on. Reduce costs, cut development time, increase production.

- Electron Beam Welding
- Laser Welding
- Resistance Spot Welding
- GTA Welding
- Nadcap Accredited
- Outstanding Quality
- Fast Turnaround Time
- Competitive Pricing
- Technical Consultation

OUR FACILITY
Electron Beam Engineering operates from an 11,000 square foot facility located in the beautiful city of Anaheim, California. We are very close to Disneyland, so the next time you’re in the area stop by for a visit.
